Project Work

Run All Apps

Sep 2025

VS Code Extension (TypeScript)

- Developed a VS Code extension that provides one-click status bar actions to execute common development scripts such as `npm run dev` and `npm start`.
- Built using TypeScript and the VS Code Extension API with JSON-based configuration for customizable command management.
- Published on the VS Code Marketplace and adopted to streamline workflows across React and Node.js projects.

ParkAvail – Smart Parking Solution

Oct 2024 – Present

Full Stack Developer (React, Node.js, MongoDB)

- Developed a full-stack web and mobile solution to display real-time parking availability and enable slot discovery for users.
- Built REST APIs using Node.js and Express, integrating MongoDB for parking space, user, and availability data.
- Implemented Firebase authentication for secure user access and session management.
- Developed responsive front-end interfaces using React for both user-facing and administrative views.
- Handled deployment and server configuration to ensure application availability and reliability.

Croche.mama – Coaching & E-Commerce Platform

Mar 2025

Full Stack Web Application

- Developed and deployed a responsive coaching and e-commerce website for online classes and product sales.
- Built a custom admin panel to manage products, orders, and course content.
- Implemented a learning management system (LMS) admin dashboard to manage student enrollments and course access.
- Tech stack included React, Vue.js, and Tailwind CSS for scalable UI development.
